| 4 | Web Server & Pengenalan PHP Dasar CSS Framework | 11 | CRUD Lanjutan |
| 5 | Web Server & Pengenalan PHP Dasar | 12 | Presentasi Proyek Besar |
| 6 | Koneksi PHP dan MySQL | 13 | Presentasi Proyek Besar |
| 7 | Responsi | 14 | Presentasi Proyek Besar |

What is Framework in general?

A framework is a **standardized** set of **pre-written code** and **libraries** that provides a structured foundation **for building applications** more reliably.

Why are Framework Important?

Frameworks are essential because they **allow developers to focus** on high-level logic **rather than repetitive tasks**, ensuring the code is scalable and easy to manage.

UTY

So What is a CSS Framework?

A collection of **ready-to-use** CSS files that offer standardized **layouts, typography, and UI elements** to maintain **visual consistency** across **various screen sizes**.

Framework CSS

UI Component

Utility First Framework

Frameworks like Bootstrap
provide **ready-made
widgets**

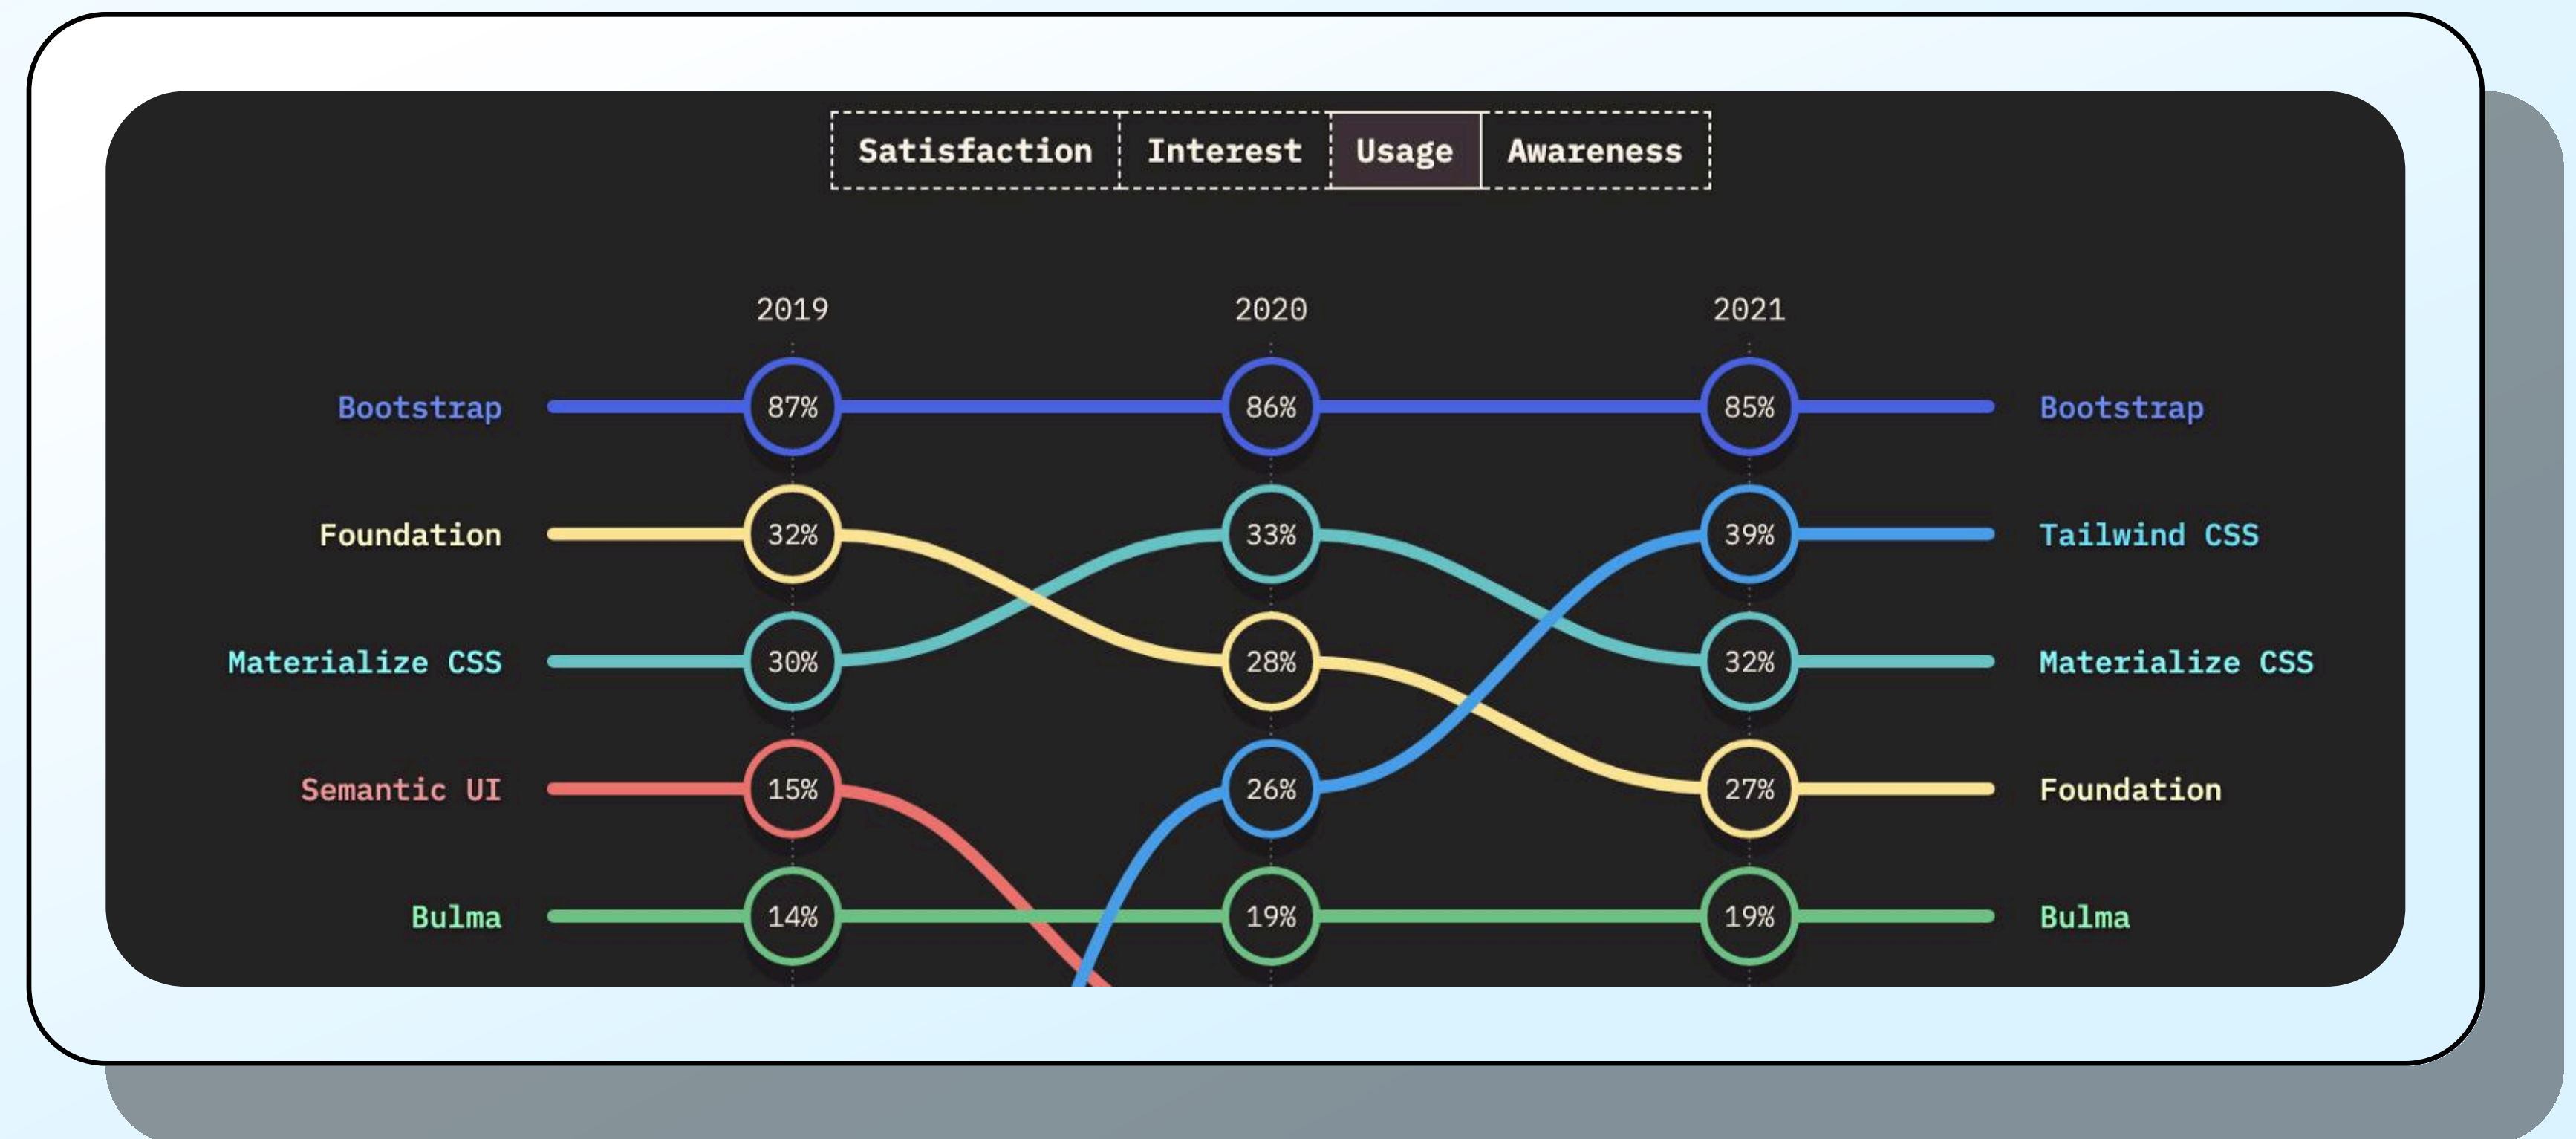

Offer **low-level classes** for building
highly customized designs from
scratch.

Most Popular CSS Framework

Before AI era & Tailwindcss was invented

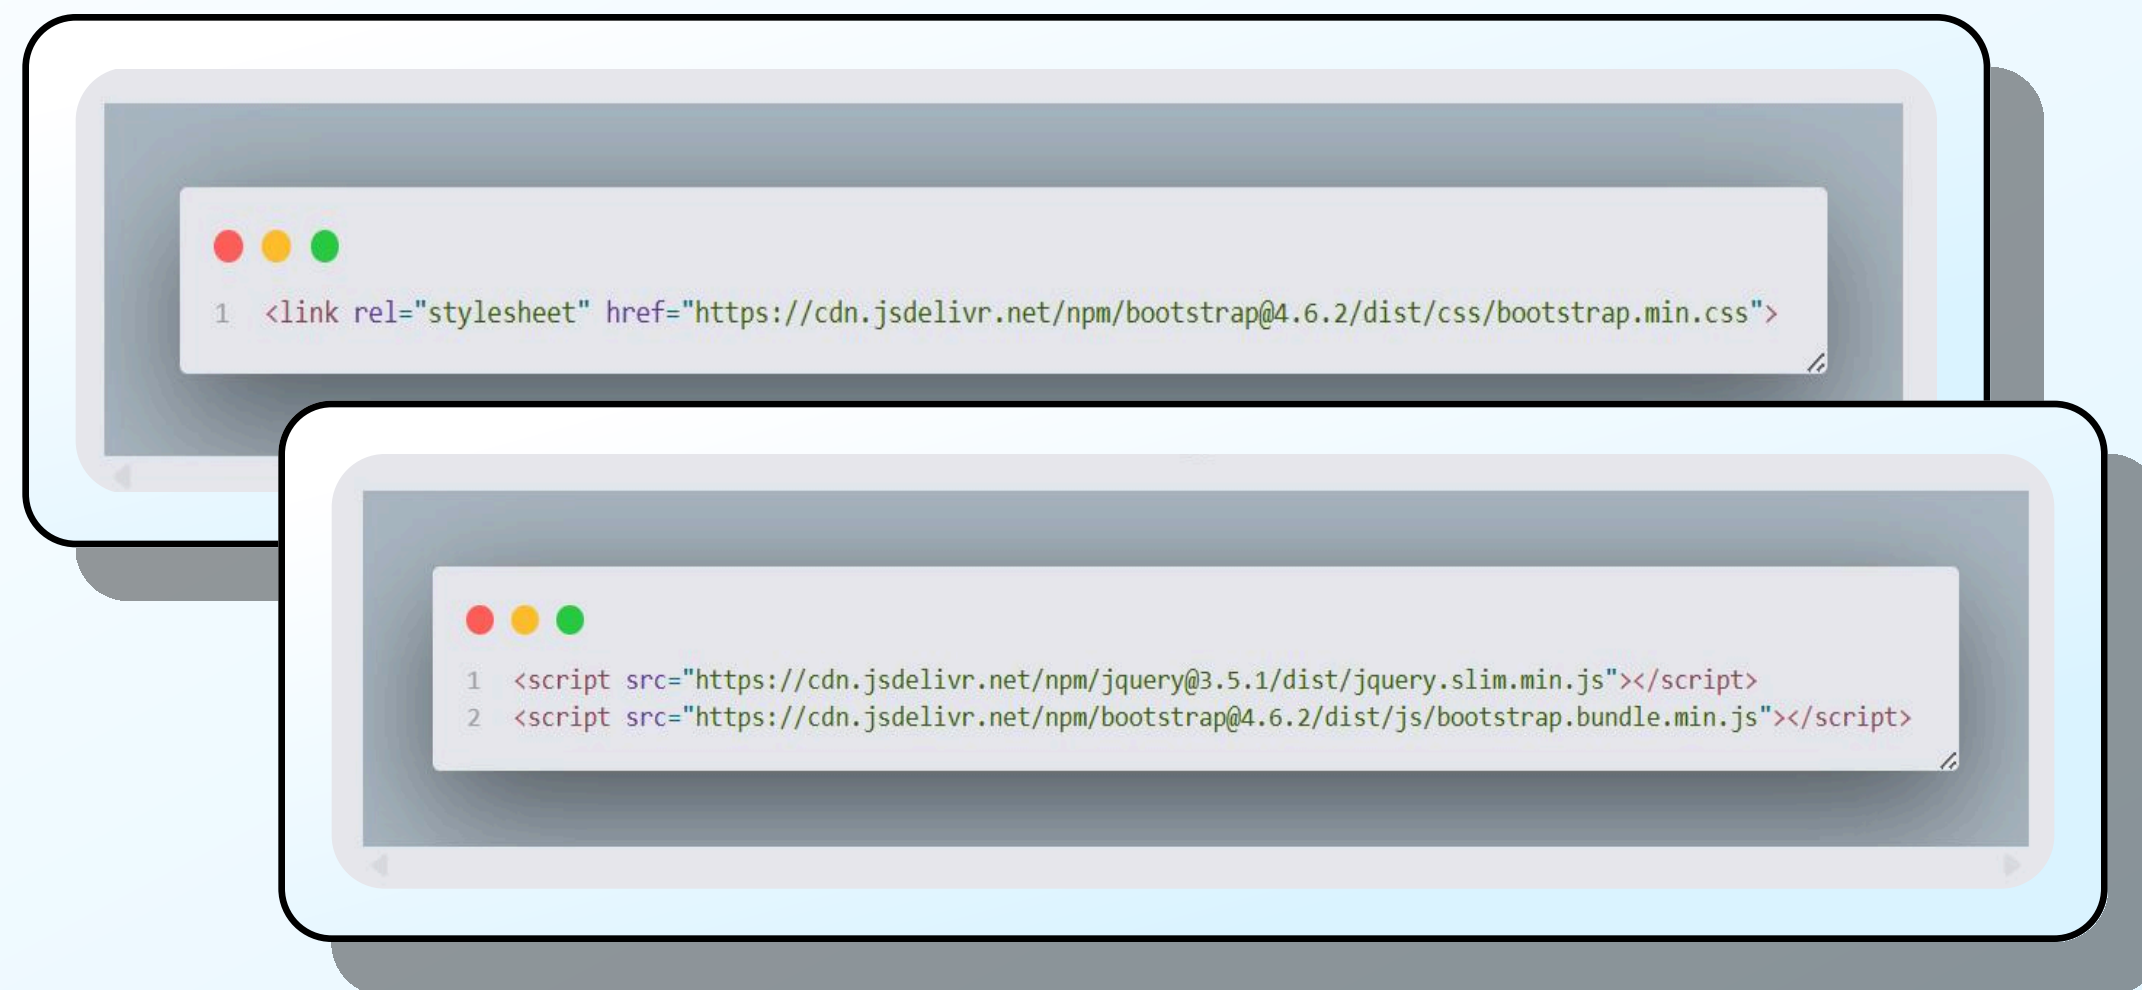

Bootstrap v4.6

Connect Bootstrap with your projects

Content Delivery Network (CDN)

- Require an active internet
- Lengthy URL paths
- + Very simple & quick setup
- + Reduces project repo files

Internal Link

- + Works offline/no internet
- + Shorter URL paths
- Require manual setup
- Increase project repo files
