Pemrograman Web Praktik **SESSIONS** pada PHP

Materi Perkuliahan

1

Perkenalan, Silabus, Pengenalan Konsep Web dan Server

2

HTML5 & CSS Dasar

3

CSS3 & UI/UX Dasar

4

CSS Framework

5

Web Server & Pengenalan PHP Dasar

6

Koneksi PHP dan MySQL

7

Responsi

8

CRUD Sederhana Dengan PHP

9

~~Integrasi PHP dan Javascript~~ **Sessions**
pada PHP

10

~~Dasar Web Service~~ **CRUD Lanjutan**

11

Dasar Web Service

12

Libur Tanggal Merah

Presentasi Proyek Besar

What is Cookies?

Web cookie is a **small piece of data a server sends to a user's web browser**. The browser may store cookies, create new cookies, modify existing ones, and send them back to the same server with later requests.

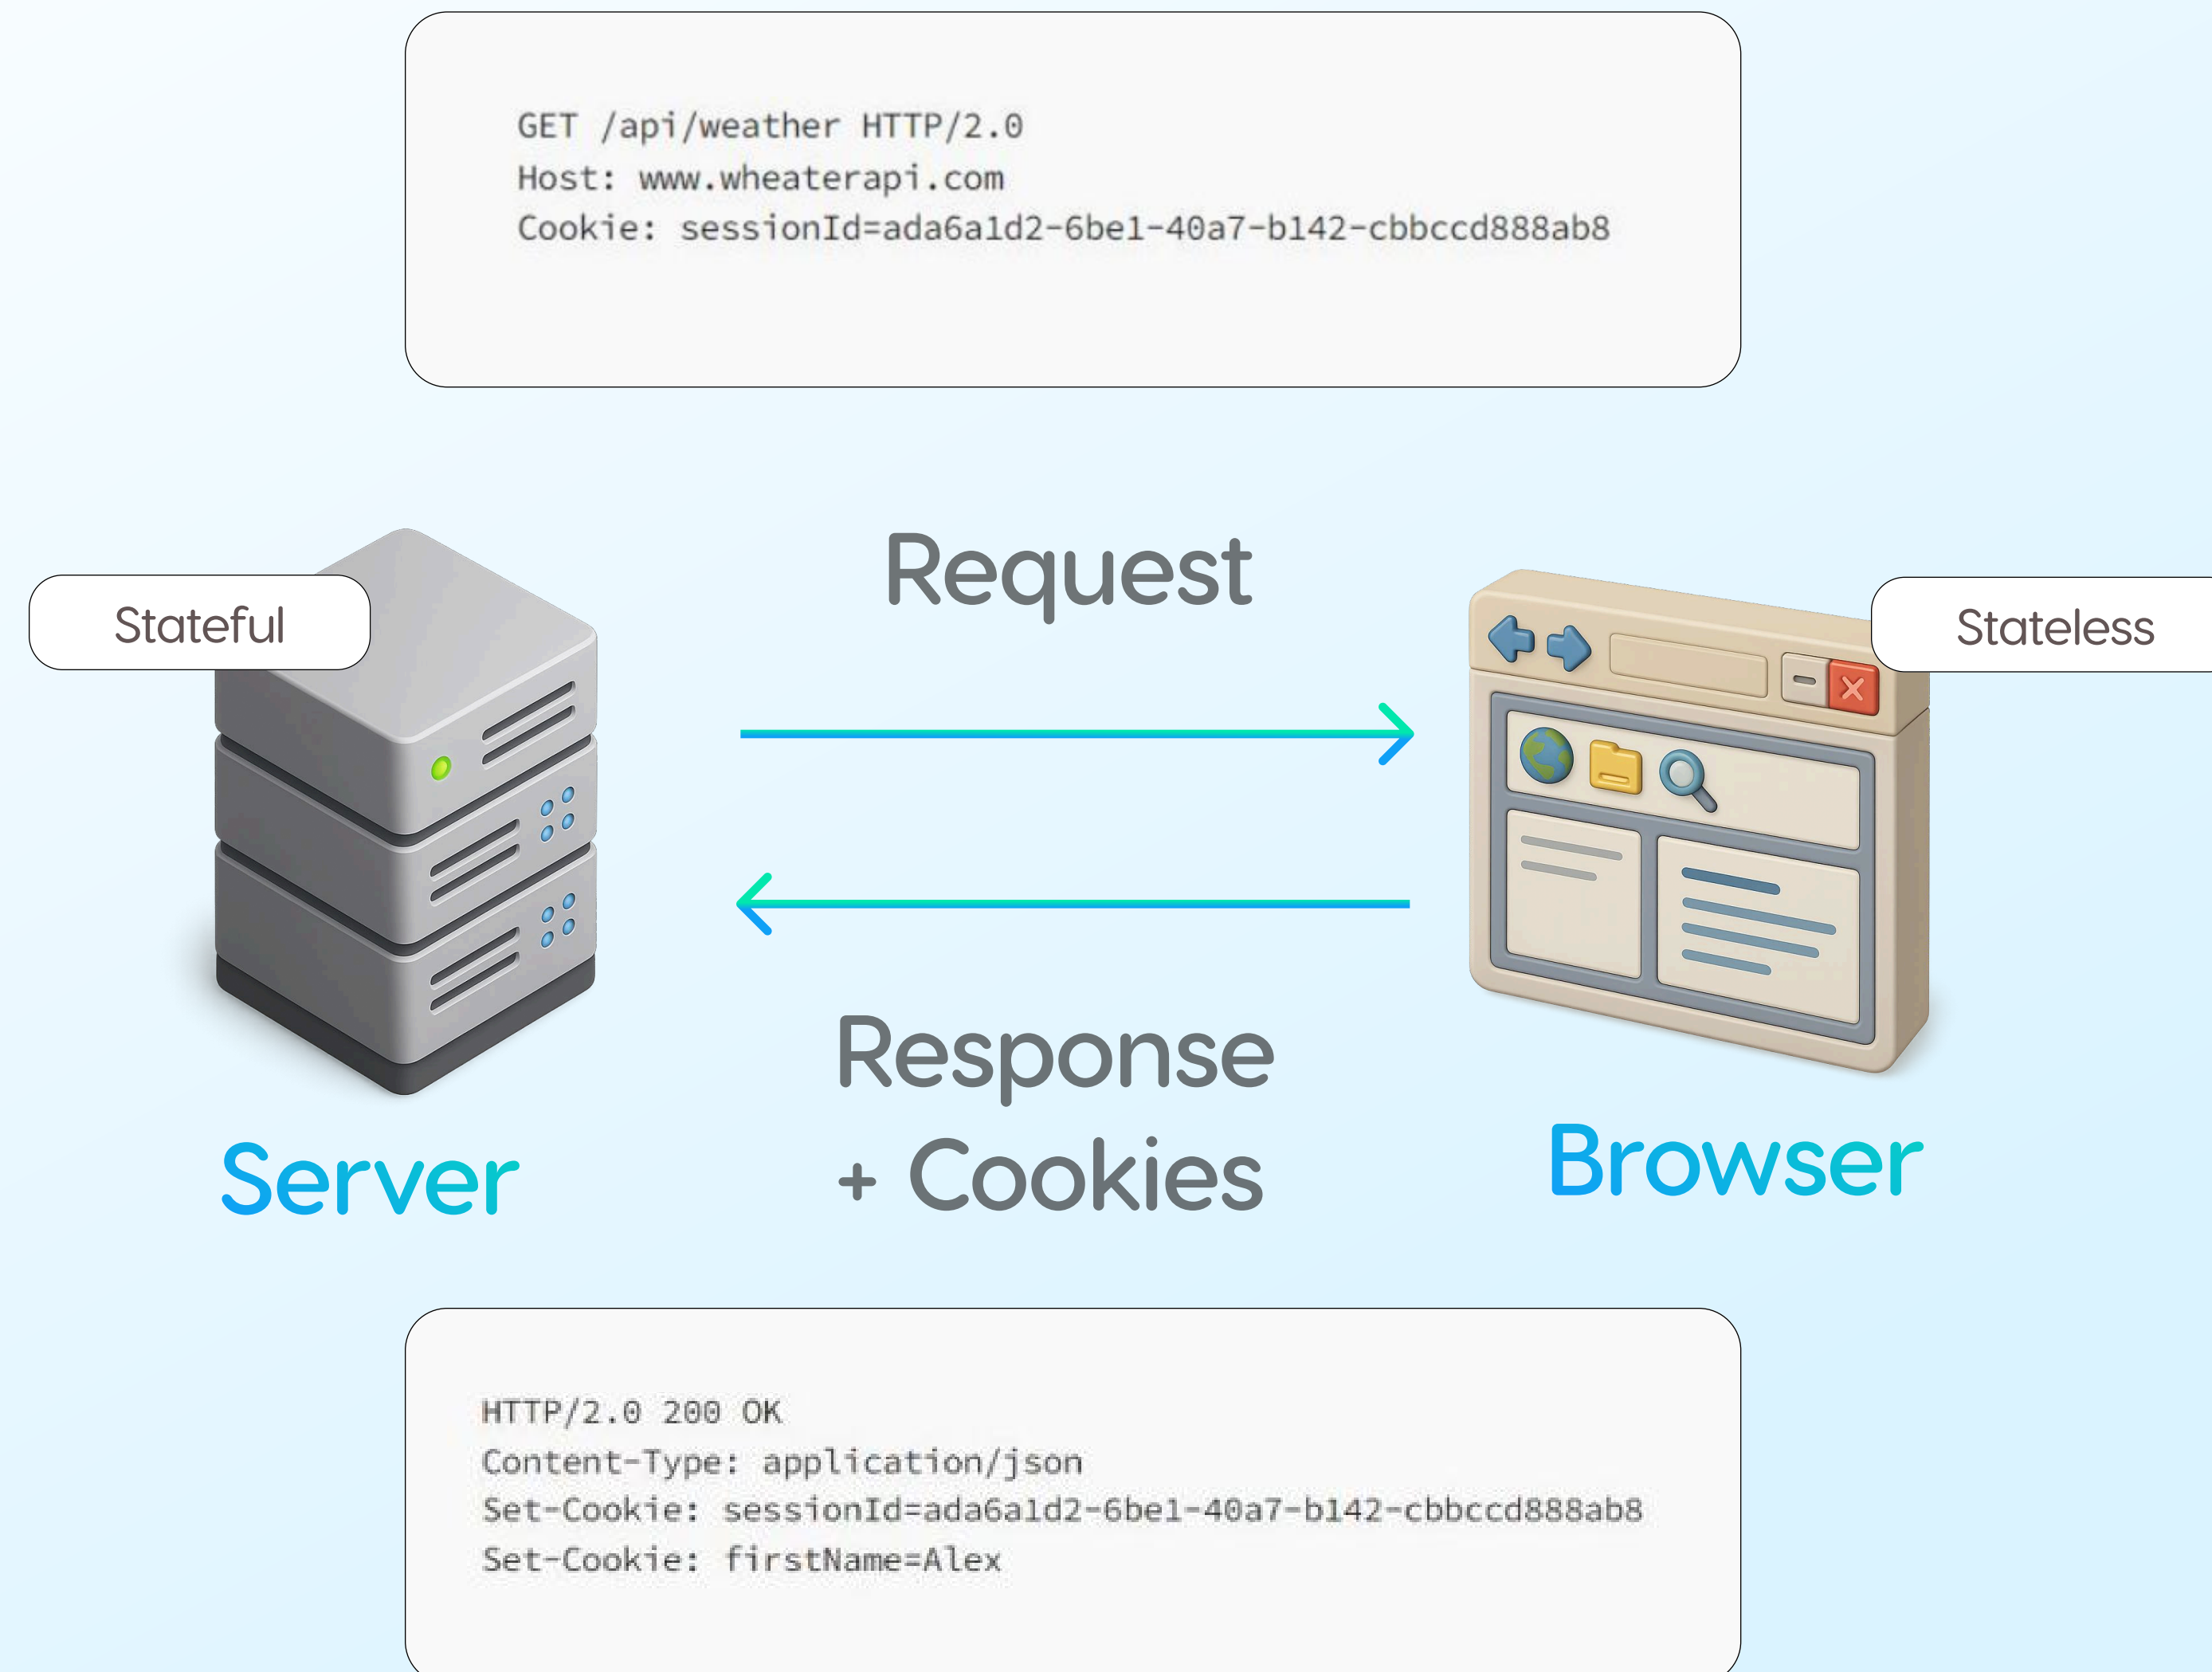

UTY

What is Sessions?

Web session is a sequence of network HTTP request and response transactions associated with the same user. **Sessions are a way of storing information about a user on the server-side.**

How it works?

Using sessions in PHP

dashboard.php

```
1  <?php
2      session_start();
3      require 'koneksi.php';
4
5      // ....
6      // ....
7      // ....
8  ?>
```

Start Engine

Set session data

login.php

```
1  <?php
2      session_start();
3      require 'koneksi.php';
4
5      $_SESSION['username'] = $_POST['username'];
6      $_SESSION['status'] = "Logged in";
7
8      // ....
9      // ....
10 ?>
```

set value

get form data

Access session data

dashboard.php

checking session key

```
1  <?php
2      session_start();
3
4      if (isset($_SESSION['username'])) {
5          echo "Welcome, " . $_SESSION['username'];
6      } else {
7          header("Location: login.php");
8      }
9
10     // ....
11     // ....
12  ?>
```

redirect

Remove session

logout.php

1 `<?php`

resume session

▶ `session_start();`

3 `session_unset();`

remove all data

destroy entire session

▶ `session_destroy();`

5 `header("Location: login.php");`

redirect

6 `?>`
